Final-year computer engineering student with solid experience in web development and a strong interest in technological innovation. Adaptable and collaborative, I am eager to further enhance my skills and contribute to impactful projects.

WORK EXPERIENCE

Full-Stack Developer Intern (PFE)

Feb 2025 - Current

IT-GROW

Ariana,Tunisia

- Developed Myco (InternConnect), a SaaS platform for intelligent intern management, using React.js, Spring Boot, and PostgreSQL to streamline task coordination and performance evaluation for SMEs and startups.
- Implemented role-based authentication, task management, and project administration features, leveraging JWT, Spring Security, and React Router for secure, user-friendly workflows.
- Designed a Kanban-style task board with Tailwind CSS and integrated email notifications using Spring Boot's email service, reducing administrative overhead by 30%.
- Explored AI-driven task recommendations using Python and scikit-learn to optimize project and tasks creation and intern-task assignments based on skills and workload.

Front-End Developer

Dec 2022 - Current

CHAIN INDUSTRIES

Tunis,Tunisia

- Developed dynamic user interface for cryptocurrency and trading platforms with ReactJS and Next.js, converting Figma designs into SEO friendly websites
- Applied Tailwind CSS for scalable, responsive design and Framer Motion for complex animations increasing user engagement by 25%
- Utilized web3 libraries like Wagmi, Blocknative, and Moralis for token and block transaction fetching, as well as wallet connection.

Full-Stack Developer

Dec 2022 - Current

FREELANCE

Remote

- Created dynamic, animated user interfaces using React, Next.js, Framer Motion, and Tailwind for various applications, portfolios, and landing pages.
- Translated Figma designs into functional websites and cloned existing sites for updates and improvements.
- Fixed backend issues in existing projects, including CRUD operations and other logic problems.
- Built a tailored portfolio for a Tunisian trading mentor with React.js, Tailwind CSS, and Firebase, featuring an admin dashboard and multilingual support via i18n, boosting client visibility and user management efficiency
- Delivered MarkitUp, a client collaboration tool with React.js and Tailwind CSS, enabling secure visual annotations and feedback, reducing project iteration time by 20%.
- Developed a Learning Management System for an educational client using Next.js, Prisma, and Stripe, enabling course browsing, secure payments, and progress tracking, streamlining online learning delivery.

Full-Stack Developer

Aug 2024 - Sept 2024

Stable Labs

Remote (Prague,Czech)

- Contributed to building a cutting-edge platform providing seamless access to tokenized real-world financial assets
- Created intuitive and responsive user interfaces to enable global users to effortlessly interact with financial assets, fostering financial inclusion.

Full-Stack Developer Intern

Jul 2024 - Aug 2024

ALGOSAMA

Ben Arous,Tunisia

- Developed a responsive real estate platform using React, TypeScript, Tailwind CSS for modern UI and seamless user interaction, and Framer Motion for dynamic animations.
- Integrated Apollo Client and GraphQL for efficient data fetching of property listings and built a secure backend with Node.js, Express, and MongoDB, leveraging JWT for authentication and Mongoose for database management

Full-Stack Developer Intern

Jul 2023 - Aug 2023

ESPRIT

Remote

- Developed full-stack solutions for team and project management with Spring and React, emphasizing user-friendly interfaces and data security.
- Implemented project creation, task assignment, and progress tracking with key performance indicators.
- Created features for team creation, role assignment, and performance evaluation to enhance efficiency and collaboration.

EDUCATION

ENGINEERING IN COMPUTER SCIENCE

Sep 2022 - Current

NATIONAL SCHOOL OF COMPUTER SCIENCES (ENSI)

PRE-ENGINEERING PREPATORY CYCLE

Sep 2020 - Jun 2022

IPEIT

SKILLS

- Tech Stack:** React, Next, Angular , Node, Express, Spring Boot, HTML, CSS, Tailwind CSS
- Tools:** Web3 (Wagmi, Moralis , Blocknative , ethersJs) , Firebase, Flyway , Cloudinary , Charts.Js , Framer Motion
- Databases:** MongoDB, PostgreSQL, MySQL, Prisma (Database Toolkit)
- Languages:** JavaScript, TypeScript, Java

LANGUAGES

French (Professional working proficiency -C 1) · **English** (Professional working proficiency)
